

Kaosar Ahmed

Full Stack Software Engineer

+880 1813-494196 | siamahmedgotthis@gmail.com | github.com/SiamAhmed32 | siamahmedportfolio.netlify.app | Dhaka, Bangladesh

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3+ years of professional experience architecting and delivering production-grade web applications for international clients across the UK, USA, Canada, and Bangladesh. Specialises in React.js, Next.js, and TypeScript with deep expertise in component architecture, performance optimisation, REST API integration, real-time systems, JWT and OAuth2 authentication, and state management using Redux Toolkit and RTK Query. Experienced in containerising and deploying applications using Docker and AWS EC2. Consistently delivers scalable, maintainable, and secure frontend systems in Agile environments — with a proven track record of end-to-end ownership across multiple concurrent international projects.

TECHNICAL SKILLS

Frontend	React.js · Next.js · TypeScript · JavaScript (ES6+) · Redux Toolkit · RTK Query · Tailwind CSS · Shadcn UI · Framer Motion
Backend	Node.js · Express.js · REST API Design · Socket.io · JWT Authentication · OAuth2 · Zod Validation · Nodemailer
Real-Time	Socket.io · Pusher · Redis · Upstash
Databases	PostgreSQL · MongoDB · Firebase
ORM	Prisma ORM
Payments	Stripe · SSLCommerz · bKash
Cloud/Tools	Docker · AWS EC2 · AWS ECR · Vercel · Netlify · Git · GitHub · ESLint
Practices	Agile/Scrum · Responsive Design · Cross-Browser Compatibility · Performance Optimisation · Code Splitting · Lazy Loading · Memoization · SEO Optimisation · XSS & CSRF Protection

WORK EXPERIENCE

Software Engineer

Elevate IT

Dec 2025 – Present

Dhaka, Bangladesh

Key Contributions

- Architected and delivered the LSO Bar Exam Platform for Ontario law candidates — designed the full frontend with timed session management, automatic progress persistence, and JWT-secured tiered access for free and paid users. Integrated Stripe for payment processing and built per-question explanation rendering aligned to the 2025/2026 LSO format. The platform is live and serving active candidates.
- Led frontend development of the Super Media Bros real-time auction platform (UK) — implemented the Socket.io bidding interface with sub-second update propagation across concurrent users, integrated Pusher for cross-device notifications, and solved the mid-session state hydration problem using Redis/Upstash caching to ensure users never see a stale bid price. Integrated with The Saleroom marketplace API.
- Established frontend security practices across all client projects — implementing XSS prevention, CSRF protection, and secure session handling as standard architecture decisions rather than afterthoughts.
- Designed and maintained RESTful backend APIs with Node.js, Express, PostgreSQL, Prisma ORM, and Zod — with optimised query design, indexing strategies, and role-based access control across all active client projects.

Software Engineer

Nexlalinx

Apr 2024 – Nov 2025

Dhaka, Bangladesh

Key Contributions

- Designed and built a 20+ component UI library using Shadcn UI and Tailwind CSS — establishing component architecture standards, naming conventions, and prop contracts that reduced new feature development time by 40% and eliminated UI inconsistencies across all active projects.
- Delivered multiple Next.js 14 and React 18 production applications — making deliberate rendering strategy decisions (SSR for data-heavy pages, SSG for static content, CSR for interactive dashboards) based on performance and SEO requirements of each specific page and user flow.
- Built a multi-layer API caching architecture using RTK Query — designing cache invalidation strategies, optimistic updates, and background refetching patterns that kept response times consistently under 200ms under peak load across all production applications.
- Applied performance optimisation techniques systematically across all frontends — including code splitting, lazy loading of routes and components, image optimisation, and memoization of expensive computations — resulting in measurably faster page loads and improved Core Web Vitals scores.
- Collaborated in a 5-engineer Agile team — leading peer code reviews with a focus on maintainability and security, contributing to sprint planning, and mentoring junior developers on component design and API integration patterns.

Key Contributions

- Led the technical delivery of a full-stack EdTech platform — coordinating a cross-functional team of developers, content creators, and designers, translating complex business requirements into structured technical specifications and sprint plans.
- Established end-to-end development workflows, code review processes, and quality assurance standards that became the operational baseline for all subsequent projects at the organisation.
- Served as the primary technical point of contact for all client communication — managing stakeholder expectations, presenting progress updates, and ensuring delivered systems met both technical and business requirements.

SELECTED PROJECTS

Coastal Water Technologies — B2B Wholesale E-Commerce (USA)

Live

- Next.js · TypeScript · Node.js · MongoDB · Redux Toolkit · RTK Query · Socket.io · Tailwind CSS
- B2B platform for US water technology professionals — 10,000+ SKUs, Quick Product Finder, multi-level navigation, cart, order tracking, loyalty rewards, and live chat widget.
 - Architected a multi-layer RTK Query caching strategy that eliminated redundant API calls across 10,000+ product pages, maintaining sub-200ms response times under peak catalogue load.

Closet BD — Fashion E-Commerce Platform

Live

- Next.js · TypeScript · Node.js · MongoDB · Redux Toolkit · RTK Query · Tailwind CSS
- Live fashion e-commerce with active customer base — full catalogue, filtering, discount management, order flow, and admin panel for inventory management.
 - Leveraged Next.js SSR and systematic image optimisation to achieve strong organic search rankings — fast page loads across all devices without client-side hydration delays.

Akashbari Holidays — Travel Agency Platform

Live

- Next.js · TypeScript · Node.js · MongoDB · Nodemailer · Tailwind CSS
- Platform for a 15-year-old travel business (5 offices) — 50+ destinations via multi-level content hierarchy (Continent → Country → Destination → Package) with a custom admin panel.
 - Designed the CMS and admin architecture for zero developer dependency post-handoff — non-technical staff manage all destinations, packages, and media without code changes.

LSO Bar Exam Platform — Ontario Legal Exam Prep (Canada)

Live

- Next.js · TypeScript · Node.js · PostgreSQL · Prisma ORM · Stripe · Tailwind CSS
- Exam prep platform for Ontario law candidates — timed 4.5-hour sessions, automatic progress saving, and free and paid exam sets with per-question explanations aligned to the 2025/2026 LSO format.
 - Chose PostgreSQL with Prisma ORM for strict relational integrity on user progress and payment records — ensuring zero data loss on mid-session disconnections.

ERP Textile Platform — Industry Management System

Live

- Next.js · TypeScript · Node.js · PostgreSQL · Prisma ORM · Redux Toolkit · RTK Query · Tailwind CSS
- Full-stack ERP for the textile industry — inventory management, order tracking, role-based access control, and file upload handling across all user tiers.
 - Modelled complex relational data across inventory, orders, and multi-tier user roles using PostgreSQL and Prisma ORM — enabling precise audit trails that a document database could not reliably support.

Real-Time Auction Platform

Live

- Next.js · TypeScript · Node.js · PostgreSQL · Prisma ORM · Socket.io · Redis/Upstash · Pusher · Tailwind CSS
- Complete real-time auction app — Socket.io bidding engine for sub-second bid propagation, Redis/Upstash caching under concurrent load, Pusher notifications, and role-based seller/buyer dashboards.
 - Solved mid-auction state consistency: Redis cache always reflects the latest bid, allowing the frontend to hydrate instantly before handing off to the live socket stream — users never see a stale price.

EDUCATIONAL QUALIFICATIONS

BSc in Computer Science and Engineering

BRAC University, Dhaka, Bangladesh

CGPA: 3.55 / 4.00

Graduated 2023

CERTIFICATIONS

Problem Solving (Intermediate)	HackerRank	2025
Reactive Accelerator: React and Next.js	Learn with Sumit (LWS)	2025
IELTS	British Council	2024
